Discussion1

1. When you put the gyroscope at a certain angle, what is the rotation value for (gx, gy, gz)?

(-200, -200, 50)

2. How to find the xyz direction of gyroscope?

把 MPU6050 某一邊朝下,看 xyz 中哪個值得絕對值最大,最大的那個就是朝下的那個 軸

Discussion2

1. Is magnetic north equal to true north (北極)? What is Magnetic Declination? 不一樣,magnetic north 是指地磁北極,也就是地球表面地球磁場方向垂直向下的點,並且會不斷改變。

Magnetic Declination 是地磁偏角,地磁偏角是指地球上任一處的磁北方向和正北方向之間的夾角

2. What is the direction when you get 0, 90, 180, 270 degrees from magnetometer?

0: 北,90: 東,180: 南,270: 西
